

## Robust, heavy duty construction

### Applications

- Allows for the control of two separate air circuits with the actuation of a single plunger
- Addresses the issues of slow brake release and the challenge of bent buttons and shafts

### Features

- Large air ports allow for high airflow and the fast setting and release of brakes and air operated valves
- · 3/4" diameter stem resists bending
- · Roller end allows for various angles of engagement
- Baylast<sup>™</sup> seal standard
- Standard 1/4" NPT air port configuration
- · Stainless screws included
- · Available in large button, roller point, and extended paddle engagement ends

#### Materials

- Baylast<sup>®</sup> seal standard
- · Stainless screws included
